Monthly Enforcement Report Summary

Period: March 2024

Generated: June 19, 2026
Bengaluru Traffic Police Enforcement Platform

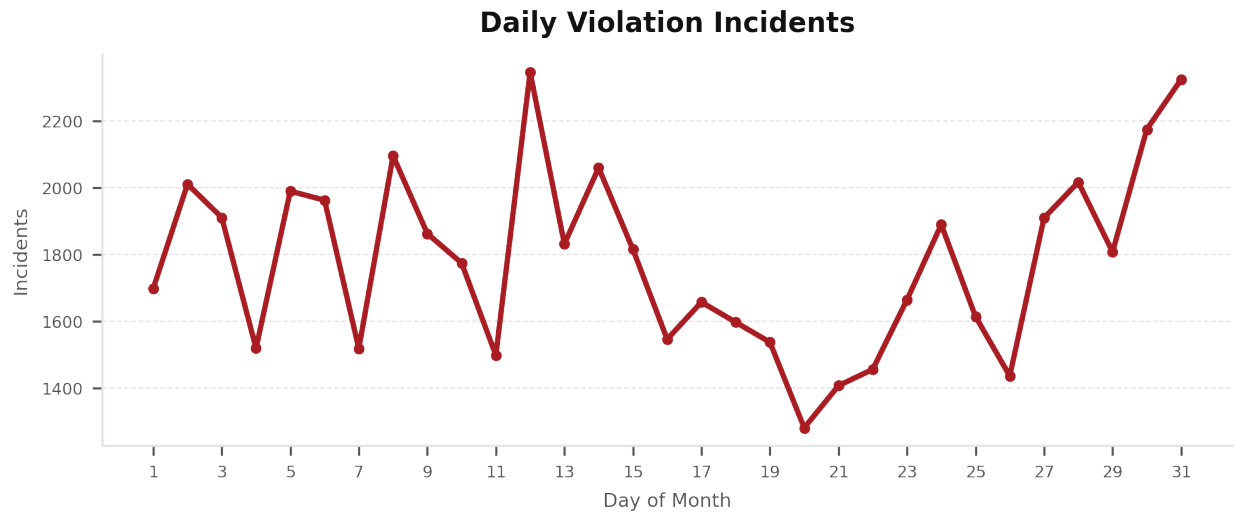

Enforcement Activity Overview

The following metrics summarize standard parking enforcement outcomes in Bengaluru during the month of March 2024. Comparative percentage changes against the previous baseline period are provided.

55,229 VIOLATIONS ANALYZED ▼ 1.1%	75.2% VALIDATION APPROVAL ▲ 356.5%
INR 0 COLLECTED FINES	INR 0 OUTSTANDING FINES

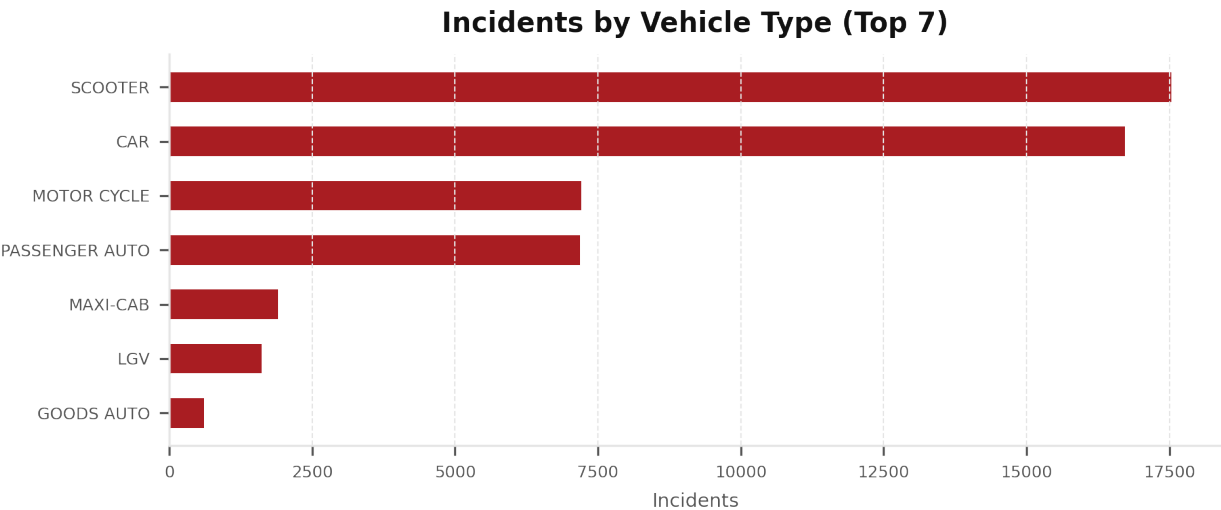

01 / Daily Violation Distribution

Takeaway: The daily incidence chart plots active violations mapped across the month. Traffic enforcement events display recurring cyclical patterns, peaking during mid-week business hours and dropping significantly during weekends. Spikes indicate windows of high-priority enforcement activities.

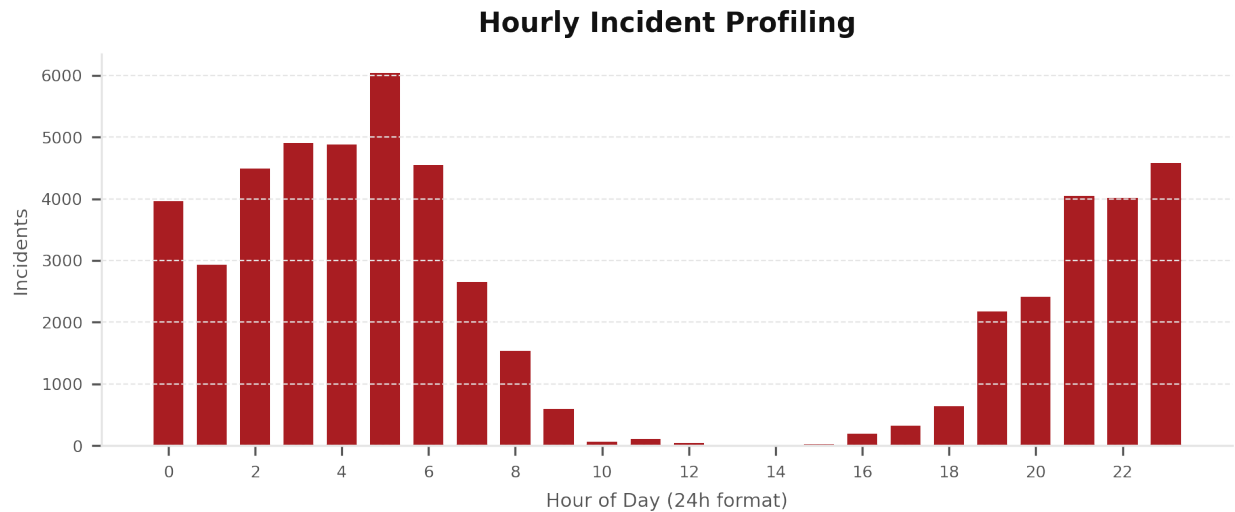

02 / Incidents by Vehicle Type

Takeaway: Two-wheelers (scooters and motor cycles) remain the primary source of parking violations. This highlights their footprint in high-density corridors. Commercial vans and passenger vehicles constitute the secondary tier of infractions.

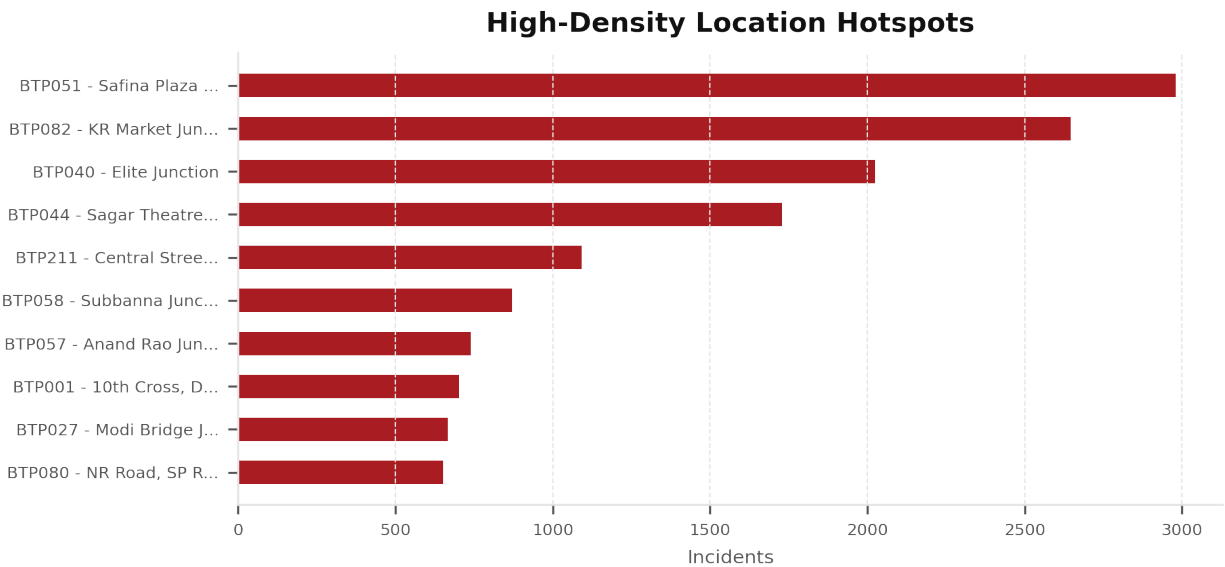

03 / Hourly Violation Distribution

Takeaway: Peak activity aligns closely with commute patterns. High concentration is observed between 9 AM - 11 AM and 4 PM - 6 PM, corresponding to business staging. Deploying active patrols during these peak hours provides the greatest relief to street congestion.

04 / High-Density Enforcement Hotspots

Takeaway: Spatial clustering isolates key bottlenecks where illegal parking blocks lanes. The top hotspots represent junctions with high recurrent delay. Targeting these locations with camera coverage prevents significant capacity losses.

05 / High-Density Hotspots List

The following list ranks the ten most active violation locations for the month, alongside their overall congestion cost index. High cost values indicate nodes where parking blocks narrow carriage lanes, causing severe delay factors.

Junction Name	Violations	Congestion Score	Daily Cost (INR)
BTP051 - Safina Plaza Junction	2,980	100.0	N/A
BTP082 - KR Market Junction	2,648	74.7	N/A
BTP040 - Elite Junction	2,025	69.4	N/A
BTP044 - Sagar Theatre Junction	1,728	68.3	N/A
BTP211 - Central Street Junction	1,093	34.9	N/A
BTP058 - Subbanna Junction	872	33.6	N/A
BTP057 - Anand Rao Junction	739	25.5	N/A
BTP001 - 10th Cross, Dr. Rajkumar Road	703	18.2	N/A
BTP027 - Modi Bridge Junction	666	29.7	N/A
BTP080 - NR Road, SP Road Junction	652	23.8	N/A

06 / Fines & SMS Penalties Summary

Summary of automated penalties issued to repeat offenders (vehicles exceeding 5 violations). Payment collections and outstanding balances are updated in real-time.

Metric Summary	Value
Total Repeat Offenders Flagged	0
Total Fine Amount Issued	INR 0
Collected Amount (Paid)	INR 0
Outstanding Amount (Unpaid)	INR 0

Simulated Data Notice: SMS notification logs, delivery status records, and simulated phone numbers are simulated for this prototype demo. No real SMS messages have been sent.

07 / Enforcement Recommendations (Next Month)

Based on mined recurrence forecasts, the following five junctions present the highest probability of peak congestion recurrence next month. Enforcement patrols and dispatch officers should be scheduled during these target windows to optimize traffic flows.

Day	Hours	Junction Name	Recurrence %	Congestion Score	Action
Tuesday	06:00-08:00	BTP051 - Safina Plaz	100%	100.0	Deploy patrol 6-8am Tue, 100% h
Sunday	02:00-04:00	BTP051 - Safina Plaz	100%	100.0	Deploy patrol 2-4am Sun, 100% h
Sunday	04:00-06:00	BTP051 - Safina Plaz	100%	100.0	Deploy patrol 4-6am Sun, 100% h
Tuesday	02:00-04:00	BTP051 - Safina Plaz	100%	100.0	Deploy patrol 2-4am Tue, 100% h
Tuesday	04:00-06:00	BTP051 - Safina Plaz	100%	100.0	Deploy patrol 4-6am Tue, 100% h
